01 Increasing direct hands-on support.

Making family practice in Burnaby more sustainable by reducing the operational and administrative barriers that contribute to physician burden and burnout.

Our goal is to provide tangible, hands-on supports that make day-to-day practice easier for primary care providers. In 2025–26, that included opportunities for learning, direct clinic engagement, team-based care, patient attachment and panel management, and targeted work with priority populations.

1. Learning and connection

389

physician attendances across **11 CMEs**

12

Neighbourhood Network meetings

23

clinics represented at MOA Network sessions

48

participants at team-based care workshops

2. Bringing support closer to practice

110

clinic visits from the Physician Engagement team

12

clinics hosted lunch and learns with PCN allied health providers

9

locums in the local network

3. Strengthening attachment and longitudinal care

17,188

successful attachments recorded in PAS in 2025–26

55,954

attachments supported by the Patient Attachment team to date

48

providers onboarded to PAS, up from 28 the previous year

4. Caring for priority populations

99.6%

of Burnaby's long-term care beds attached to a family physician

1,654

patients identified as potentially eligible for attachment to MOSAIC Community Clinic

2

free metabolic screening clinics hosted, reaching 50+ Burnaby residents

Burnaby Primary Care Network

The Burnaby Primary Care Network provides no-cost, low-barrier health and well-being services that extend the capacity of family practice. In 2025–26, the PCN focused on strengthening team-based care, improving how patients move through services, and introducing targeted new pathways based on local need.

Extending primary care through allied health

12,565

referrals as of
March 31, 2026

3,577

referrals accepted
in 2025–26

28,102

patient encounters
in 2025–26

10

allied health
services

42.1

FTE clinicians

growing

16

health and well-being
workshops delivered
in community

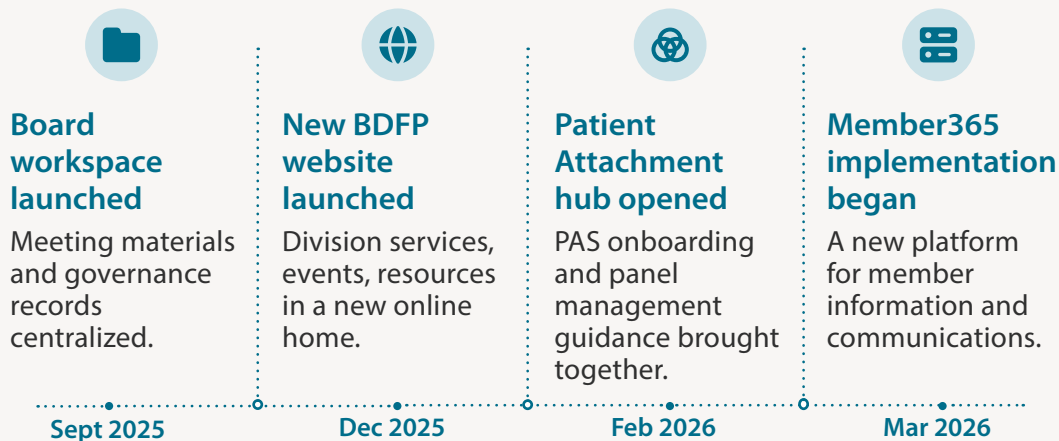

PCN connects primary care with food security, newcomer services, seniors' supports, unhoused and underhoused services, youth initiatives, social connection, and digital health literacy.

02 Strengthen the Burnaby Division's effectiveness

Invest in the Division's internal capacity, systems, and people needed to consistently deliver real, measurable value to members.

In 2025–26, the Division invested in the digital systems and internal processes that shape how members interact with the organization.

MAKING DIVISION SUPPORT EASIER TO ACCESS

DIGITAL ENGAGEMENT

64.5%

average open rate for the *Burnaby Brief*, monthly member newsletter

4,401

Division website views from its December 2025 launch to March 31, 2026

73.1%

average open rate for The Check-Up, the PCN's community newsletter

23K

PCN website users

03 Increase recruitment supports

Improve recruitment outcomes through targeted, proactive strategies and make Burnaby an attractive place to establish family practice.

In 2025–26, recruitment helped providers find the right fit, connect with the PCN, and establish practice in Burnaby.

BRINGING MORE PROVIDERS TO BURNABY

13 longitudinal physicians recruited	7 physicians recruited to Edmonds UPCC
1 Burnaby locum recruited	1 nurse practitioner recruited
